“Excellence in Everything we do...”

The Process of Building a Custom website with GreenTree Software

You've expressed interest in building a custom website with us. Now we begin the process of developing your ideas into a website that will accomplish your goals. By drawing on our experience and skill, we can provide your organization with the maximum return on its dollar.

Here are the steps that we will take in building your site.

1. Initial Consultation to learn your website goals. (1 Hour Complementary)
 - a. Brainstorming to increase usefulness / effectiveness of website
2. Estimate based on consultation.
 - a. Acceptance or Adjustment of Requirements
 - b. Invoice for Hosting / Domain Registration and Website Design deposit.

Once GreenTree Software is authorized to start the project.

3. Client pays for web hosting and Domain registration for one year, and pays a deposit of 1/3 of the Website Design.
4. Story-board website (2 days)
 - a. A quick and effective layout of the website often pencil on paper
 - b. Site plan is presented on paper for Approval or Revisions
5. Client provides content, and available graphics for the website.
6. Proto-type the website (1 week)
7. Tune website. (1 week)
8. Beta Release: Client has access to website online.

Once you accept the website and pay the remaining cost of website

9. Client is invoiced for the remaining 2/3 of the Website Design cost
 - a. The Website is publicly available.
 - b. The Website promotion is done as per contract.

Here is a Testimonial from one of our Custom Site Clients:

“Having our organization’s information on our website makes my life and my job easier.”
Shane Rahn, Owner & Chief Instructor, Rahn’s Blackbelt Academy.

A handwritten signature in blue ink, appearing to read 'Shane Rahn'. The signature is fluid and cursive, with a long horizontal stroke at the end.
